Keyboarding Skills for children with SLD

Learning to touch type, i.e. type using proper finger-key combinations without looking at the keyboard, helps children with SLD recognize letters and improve hand-eye coordination. It is an empowering skill with lifelong benefits.

Features:
1) Multisensory, interactive and entertaining
2) Correct posture and good keyboarding habits
3) Use of proper finger-key combinations without looking at the keyboard
4) Systematic practice in typing selected letters and words introduced in progression.
5) Practice in coordinating audio input, visual guidance and physical performance under the careful guidance and encouragement of teachers.
6) Learners progress at their own pace and are awarded a certificate upon satisfactory completion of each level.
